

## January 27, 2006 - Buildingi (pronounced Building-eye) and CenterStone Software Announce Partnership

Integrating service and technology for visually managing the workplace across the entire enterprise

Seattle, WA – January 27, 2006 – **Buildingi**, developer of comprehensive set of Space Management solutions, has partnered with CenterStone Software, Inc., a leading provider of occupancy management solutions, to provide organizations in the Pacific Northwest with cost efficient solutions and strategies for corporate workplace management.

**Buildingi** solutions are employed to support management of over 22 million square feet of facilities world-wide. **Buildingi** systems and processes manage the complete life cycle of facilities – from design and construction coordination to space-use and occupancy planning. Organizations benefit by reducing the total cost of ownership of their real estate portfolios.

More than 50 of the world's largest organizations, including AIG, Dell, Harvard University, Juniper Networks and sanofi-aventis, are using eCenterOne, CenterStone's Web-based Integrated Workplace Management Solution (IWMS), to save millions of dollars in occupancy costs every year by automating critical workplace business processes and information, improving portfolio visibility and gaining a better understanding of the financial and operational impact of multi-million dollar business decisions.

"Whether the task is software selection, design and construction or project document cleanup and archival we want to provide our customers with the best solutions available," said Bill Nolan, president of **Buildingi**. "eCenterOne provides our customers with a single user-friendly Internet-based system that provides unparalleled real-time views across the enterprise enabling organizations to better understand their workplace and make more informed operational and strategic decisions."

The integration of **Buildingi**'s consulting services and CenterStone's eCenterOne solution provides companies with a comprehensive solution to meet their organizational goals. Although each approach is tailored to fit each client's unique requirements, the end goal remains the same for all enterprises: optimizing the performance of the workplace through better utilization, project archival, and reduced operational cost.

"As the second largest expense and a key source of value for large organizations, the workplace is increasingly strategic at the boardroom level," said CenterStone Chief Technology Officer Ross Leibowitz . "The combination of **Buildingi**'s services and CenterStone's market-leading solutions allows companies to capture and understand information from the workstation to the portfolio level, pursue more informed growth and consolidation strategies and become more agile and efficient in how they plan and manage their space and occupancy."

### About **Buildingi**:

**Buildingi** provides enterprise software solutions for visually managing the workplace; enabling organizations to reduce cost and improve service levels by optimizing space and occupancy and automating manual processes in the workplace. As **Buildingi** provides leadership in the development and delivery of this technology to worldwide clients, we have documented some of the best practices that have been implemented throughout a variety of industries. The company is headquartered in Seattle, WA. For additional information, please call (206) 388-2280 or visit <http://www.buildingi.com>
