**BUILDINGI RECOGNIZED AS ONE OF THE FASTEST GROWING PRIVATE
COMPANIES IN WASHINGTON STATE**

Company Ranks #21 on Annual Puget Sound Business Journal List

Seattle, WA – October 27, 2008 – Buildingi, a leading provider of high-impact back office technology solutions designed to help Fortune 1000 clients actively manage their real estate portfolios, today announced that it has been named by *The Puget Sound Business Journal* as the 21st fastest growing private company in the State of Washington. The annual award ranks companies by percentage of revenue growth over the past three years.

The ranking for the list of Fastest Growing Company's was comprised of 2005 through 2007 revenue percentages. During that time Buildingi launched highly strategic facilities management solutions for Microsoft and others. A key strength of the company is its ability to create bridges between facilities information and the technology and best practices required to effectively manage it. With access to accurate, up-to-date facilities information organizations have the knowledge needed to make highly informed strategic decisions related to issues such as real estate expansion or divestiture and daily operations decisions such as department relocations and facilities construction. Founded in 2005, Buildingi currently has more than 45 million square feet of facilities under management world-wide.

Buildingi Chief Executive Bill Nolan expressed his pride in the local recognition, "The team has worked extremely hard and it's very exciting to be recognized for the early efforts that helped us reach this point." Nolan added, "We look with confidence to the future as we continue to expand our market presence by bringing our innovative solutions to the growing list of clients that understand the value of strategically managing their real estate portfolios—often one of the top two largest asset classes for Fortune 1000 organizations."

About Buildingi

Buildingi solutions create a bridge between building information, technology and best practices for Fortune 1000 corporate real estate service teams. With more than 45 million square feet of

facilities under management world-wide, Buildingi specializes in providing high-impact back office technology solutions, best practices and day-to-day strategies to help clients actively and accurately manage their real estate portfolios. The company's four service offerings include: front-end and backend IWMS Consulting, Design & Implementation; the Project Knowledge Center, a privately-hosted real estate portfolio portal that enables design, construction and space-use planning collaboration through access to current and accurate real estate information; plus Application and Development Services; and Space Management Consulting and Contract Services. Together these offerings support the Buildingi goal of helping organizations reduce the total cost of ownership of real estate portfolios. For more information please visit www.Buildingi.com.
